It is designed to be used as a companion to the Garmin Connect mobile app, and is designed to be used as a companion to the Garmin Connect mobile app. It is designed to be used as a companion to the Garmin Connect mobile app, and is designed to be used as a companion to the Garmin Connect mobile app.

It is designed to be used as a companion to the Garmin Connect mobile app, and is designed to be used as a companion to the Garmin Connect mobile app. It is designed to be used as a companion to the Garmin Connect mobile app, and is designed to be used as a companion to the Garmin Connect mobile app.

API-KEY

1. Visit aistudio.google.com/apikey 2. Click on "Create API Key" 3. Click on "Create API Key" 4. Click on "Create API Key" (Alza...)

Gemini 2.5 Flash is designed to be used as a companion to the Garmin Connect mobile app, and is designed to be used as a companion to the Garmin Connect mobile app. It is designed to be used as a companion to the Garmin Connect mobile app, and is designed to be used as a companion to the Garmin Connect mobile app.

1. Visit console.anthropic.com 2. Click on "API Keys > Create Key" 3. Click on "API Keys > Create Key" 4. Click on "API Keys > Create Key" (sk-ant-...)

1

Open Chrome and go to [GarminWO](#).

2

Click on Gemini or Claude to start a new chat.

3

Click on the API key button to generate a new API key. The API key will be displayed in the console.

How to connect your Garmin device to GarminWO

GarminWO is a web application that allows you to connect your Garmin device to the GarminWO API. (GarminWO is a web application, not a mobile app. You can find the source code on [GitHub](#).) You can connect your Garmin device to GarminWO using the Garmin Connect app.

1

Go to [connect.garmin.com](#) in Chrome and log in with your Garmin account.

2

Click on "My GarminWO" in the top right corner. You will be redirected to the GarminWO page on Garmin Connect.

3

Click on the "Add Device" button to add a new device.

4

Click on the "Add Device" button to add a new device. You will be prompted to select a device type. Select "Garmin" and then "Garmin Connect".

5

Click on the "Add Device" button to add a new device. You will be prompted to select a device type. Select "Garmin" and then "Garmin Connect".

6

Click on the "Add Device" button to add a new device. You will be prompted to select a device type. Select "Garmin" and then "Garmin Connect".

7

Click on the "Add Device" button to add a new device. You will be prompted to select a device type. Select "Garmin" and then "Garmin Connect".

You can also connect your Garmin device to GarminWO using the Garmin Connect app. The app will prompt you to connect your device to the GarminWO API. You can also connect your device to the GarminWO API using the Garmin Connect app. The app will prompt you to connect your device to the GarminWO API.

JSON-EXPORT GARMIN

GarminWO is a web application that allows you to export your Garmin data to JSON. You can export your data to JSON using the GarminWO API. You can also export your data to JSON using the Garmin Connect app.

1

Go to [connect.garmin.com](#) in Chrome and log in with your Garmin account. Click on the "JSON" button to export your data to JSON.

2

Generate a JSON object with the following structure:

3

The JSON object should have a key named "workout" with a value of an array of workout objects. Each workout object should have a key named "type" with a value of "warmup", "interval", "recovery", "cooldown", or "repeat".

4

Each workout object should also have a key named "duration" with a value of a number representing the duration in minutes.

Example JSON object:

```
{  "workout": [    {      "type": "warmup",      "duration": 5    },    {      "type": "interval",      "duration": 10    },    {      "type": "recovery",      "duration": 5    },    {      "type": "cooldown",      "duration": 5    },    {      "type": "repeat",      "duration": 10    }  ]}
```

GarminWO — Page 3

GarminWO is a tool that generates workout plans based on your preferences. It uses the Garmin Connect API to fetch workout data and generate plans.

Type	Role
warmup	Warmup — prepares the body for the main workout by increasing heart rate and blood flow.
interval	Interval — a period of high-intensity exercise followed by a period of low-intensity exercise.
recovery	Recovery — a period of low-intensity exercise that helps the body recover from the previous workout.
cooldown	Cooldown — a period of low-intensity exercise that helps the body cool down after the main workout.
repeat	Repeat — a period of high-intensity exercise that is repeated multiple times.

GarminWO uses the Garmin Connect API to fetch workout data. The API returns a JSON object with the following structure:
